Test Comments: John commented that his grid field tile system helped maintain consistently good corn yields across the field this year. May & June rains were excessive. Fortunately, the tests were tilled. Hybrid emergence was very uniform. Minimal stalk rot noted. Very windy while harvesting, but hybrids stood just fine. Plant height ranged from 8-10 feet. Ear development was excellent with tip fill, depth, & quality.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceeded the grain moisture limit for this test. **ns** = column values not significantly different
